SVHCs Compliance Declaration

Helsinki, 16 January 2020 – ECHA has added three new substances to the Candidate List due to their toxicity to reproduction, and a combination of other properties of concern. The latter causes probable serious effects to human health and the environment, giving rise to an equivalent level of concern to carcinogenic, mutagenic and reprotoxic (CMR), persistent, bioaccumulative and toxic (PBT) and very persistent and very bioaccumulative (vPvB) substances. The Candidate List of substances of very high concern (SVHCs) for authorisation now contains 205 substances.
